Freedom of mobile technology

XpressVal's suite of products, used by valuers throughout Australia, has slashed turnaround times by more than 50%, created paperless residential valuation workflows, improved client communication and relationships and increased profitability. XpressVal software is built to LIXI standards and is available to valuers across Australia.

XpressCentral

- Comprehensive property valuation database
- Sends valuation reports using XML, PDF or fax
- Written in line with current LIXI standards
- Extensive Valuer, Admin and Client reporting
- Builds your own sales database
- Document store, enabling paperless residential valuations and fast access to information
- Integrates seamlessly with accounting packages

XpressMobile

- For use on tablet PCs
- Receive valuation requests instantly while in the field
- Update status information
- Search sales databases and submit valuations with photos and sketch plans while in the field
- Organise live valuations in diary format
- No need to visit the office, can work remotely
- Mobile office operating in real time

XpressSketch

- Easy to use sketching software
- Calculates the area of a property
- Can be installed on your desktop, PDA or Tablet PC
